

KHANYISA BACK TO SCHOOL ON JOB CREATION

BACK TO SCHOOL APPOINT WORKING TEAM

By: Milton Malatse

The back to school project has taken its initiative to appoint the board of directors that will speed the process of the project. The appointment of this working committee was based on their hard working in their departments and in the community. The following stakeholders were appointed and given their job description in the project.

Milton Malatse was appointed as the **chairman and Project director, Deputy Chairperson is Maditsietsi Tsotetsi** and project coordinator, **Jerry Nkambule** from correctional services has been appointed a **secretary general and educational and skills development** in and out of the schools **Joe Ngwenya**, the director of *Learn it on Demand* was appointed as the **deputy secretary and Tertiary Skills development**. **Dr D Nkosi**, the principal of Ithafa Comprehensive high school is the **treasurer and project convenor in the department of education** in the region; he will also be in the panel of judges. **Austin Moyo** the CEO/Publisher of Khanyisa Media house was appointed as **Media Liaison officer**.

We are persuading **Mama Flora Maboa-Boltman** the MMC of corporate services in Gert Sibande district to **head the government corporate sponsorship management in the project** and **Chris Mkhize** from Msukaligwa municipality is also in the sport

light to head youth and development in the district.

The project management decided to visit Ithafa to close the first term of the project as it is where it started to spread the gospel of distinction to the students and the 2012 grade 12 top achievers gala dinner that will be held on the 12 of October 2012 in the district; the aim of the gala is to wish them good luck for their final exams. Get the previous Khanyisa Newspapers and follow back to school page.

The project management would like to send our message of gratitude to students, teachers and management of Ithafa high school for their love, humbleness of welcoming us in the school.

We also extend our gratitude for the questions and clarifications that you asked during the session with the project director Milton Malatse. Indeed it gave us the light on challenges of what you want us to address through this project.

Suggestions and complements that we got from Ithafa were welcomed.

We believe that it is not only Ithafa that wanted the clarification on the project but the entire students across the district. We would like to acknowledge that we assessed your questions and we answered them all and if you are not content with the answers, contact us we will come to you.

Ithafa Student: I am Lindokuhle Nkosi the chairperson of (SRC) in the school. I do not have much to say but I would like to be part of that gala dinner, because I am passionate and confident that I will make it through. I also would like to thank you Milton for motivating us and facilitating us on how to follow our routine in life. I hope a lot of learners will come from Ithafa Comprehensive School to the gala dinner and benefit from this project.

Milton Malatse: Khanyisa Back to school project management, sponsors and the government can be glad if all students would realise that the back to school project has come with solely initiative to assist the department of education, sports arts and culture to identify the talent from the schools and in the entire community.

Our mandate is to produce high pass rate in grade 12 and our aims is to accomplish their dreams by taking them to the high educational institutes across the country. And by 2016 Khanyisa back to school project will have transplanted ambassadors in all corporate business industry across the world. My name is Sibonelo Shongwe; I am in grade 12 at Ithafa Comprehensive School in Ermelo. When I finish school i want to do electrical engineering.

Milton: thanks for having chosen a career, unlike other students that do not know what they want to be next year; and it helps you to focus in

your studies and planning your future.

My name is Lindokuhle Patricia Nkosi I am currently in grade 12 at Ithafa Comprehensive School. I'd like to become a Medical Technician. I'm willing to make my dream come true.

Milton: Lindo, follow your dreams and your dreams will be your destination; there is nothing that is impossible in life, if you decided to do it. You should know that there is no problem in life but there are challenges; the problems will come when you are dead because you cannot make it again.

Question: I am Between Thwala I want to be a motor mechanical engineer

Milton: I am glad to hear that you want to be a motor mechanical engineer and you do not wish to be a motor mechanical engineer. I believe you understand the difference between wanting something and wishing to be something. So I understand that you want, you do not wish to be; so just concentrate in your studies and be a top achiever of the year and you will get a free sponsor to accomplish your dreams.

Question: I am Lindokuhle Gracious Mkhize. My dream is to become a mechanical engineering e.g. a Welding. I would like you Milton to help me achieve my goal as a girl who is a hard worker.

Milton: Khanyisa Back to school project will do its level best to accomplish your dreams, provided if

you will not cheat yourself of not continuing with your vision and dreams. Pass your matric with flying colours and you will find a bursary or sponsor for your tertiary studies. Siyabonga Simelane. What is the overall mark that we must get in order to secure a sit in the gala dinner?

Milton; Siyabonga, It is a biggest challenge for the gala as you are contesting against the entire grade 12's of Gert Sibande district. You are not contesting only against Msukaligwa local municipality, think how many grade12 students are in Gert Sibande and ask yourself how many marks will secure you a seat in the gala dinner.

Eunicia Motha. Some of us want to become doctors but we are not really sure about our qualities whether we qualify personally. Would it be possible for those interested to experience a day working with a doctor?

I am Nonkululeko Portia Motha currently doing grade 12 at Ithafa, my wish is to become a professional nurse when I finish my matric.

Milton: You both had the same question, so the working committee of back to school will arrange with the professional doctors to help you in few weeks so you can get special information on your courses.
